

SKYWORKS®

New Product Announcement

| New Skyworks LNA FEM for GPS Applications

SKY65903-11

Skyworks is pleased to introduce the SKY65903-11, a new low-noise amplifier, front-end module with integrated pre- and post-filters for GPS receiver applications. This 1559-1606 MHz high performance module is ideal for global positioning and navigation satellite systems in end products such as fitness/activity trackers, watches, pet trackers, smartphones and tablets. The device features high linearity, excellent gain, and a low noise figure for improved signal-to-noise ratio. Integrated pre- and post-filters provide low in-band insertion loss and excellent rejection for the cellular, PCS and WLAN frequency bands. Low current consumption extends battery life and single DC supply simplifies design and minimizes board layout. Its compact 16-pin, 2.5 x 2.5 mm Multi-Chip Module (MCM) package allows for a highly manufacturable and low-cost solution

The data sheet can be found at:
