

New Product Announcement

| Skyworks' Highly Integrated Front-end Module for ISM and Connected Home Applications

SKY66105-11

Skyworks is pleased to introduce the [SKY66105-11](#), a new high performance, highly integrated RF front-end module (FEM) designed for high power Industrial, Scientific and Medical (ISM) and Connected Home applications operating within the 902 to 931 MHz frequency band. This FCC-compliant module integrates harmonic filters and shielding, making it an ideal design choice for sensors, smart meters (water, gas, electric) and machine-to-machine uses.

The SKY66105-11 features:

- 30 dBm Pout which maximizes range while staying *within FCC regulatory limits*
- A single-ended 50 Ohm transmit/receive interface, offering a *reduced bill of materials*
- *Fast ON/OFF time* (1-2 μ sec), resulting in a reduction in current and enabling rapid timing and multi-protocol arbitration
- RF blocks which operate over a *wide supply voltage range from 2 to 4.8 V* for battery-powered applications
- *Industry-leading compact* MCM 12-pin 8 x 6 x 1.05 mm package

The data sheet can be found at:
